Ali Al-Fatlawi

Full-Stack Software Engineer · iOS · Web · Backend

Ankara, Turkey +90 534 203 83 26 ali.a.mardan@gmail.com github.com/Alifatlawi linkedin.com/in/alfatlawi alialfatlawi.com

SUMMARY

Full-stack software engineer with 3+ years of professional experience shipping production software across iOS, web, backend and desktop. Built and released **10 live applications**, including **Atılım Schedule** (~7,000 active students, officially adopted by Atılım University) and **TAD** (~4,000 students within its first month). Delivered end-to-end platforms for clients in **Iraq, Lebanon, Libya and Turkey**, including Qi Card (Iraq's largest payment card company), a Libyan government ministry and Turkish government agencies. Owns products from requirements and system design to deployment, with deep experience in Arabic-first, right-to-left products.

EXPERIENCE

Freelance Software Engineer — Self-Employed
Remote / Ankara · 2024 – Present

- Design and deliver full-stack platforms end-to-end (requirements, API and database design, web, mobile, deployment) for clients across ad-tech, e-learning, fintech, healthcare, government and retail.
- Built an outdoor-advertising management platform for **Target Advertising (Iraq)** and redeployed it as a product for a second client, **AIM Media (Lebanon)**.
- Delivered an application-workflow system for the **Libya Ministry of Economy** with three separate user roles and interfaces.
- Built offline-first desktop software (**Saydalia**, **Mizan**) now used by 15+ pharmacies and businesses across Iraq.
- Integrated third-party services including SOAP payment APIs, Vimeo, Backblaze B2, OpenAI and Google Gemini.

Software Engineer — Biligoba Teknoloji
Ankara · Mar 2023 – Jul 2026

- Developed and maintained full-stack applications across iOS (Swift/SwiftUI), backend (NestJS, Go, FastAPI) and web (Next.js/React) for internal products and company clients.
- Delivered two confidential mobile applications for Turkish government agencies, including the **Turkish Gendarmerie (Jandarma)**, under strict data-security and confidentiality requirements.
- Led technical discussions and mentored junior developers, applying SOLID principles and clean-architecture practices.

Mobile App Developer (Internship) — Biligoba Teknoloji
Ankara · Feb 2023

- Built cross-platform Flutter applications with senior developers, implementing responsive UI, API integrations and state management.

Mobile App Developer — TÜBİTAK Project, OSTİM Teknik Üniversitesi
Ankara · Ongoing

- Building the mobile control app for a TÜBİTAK-funded electric micro-vehicle project, in partnership with OSTİM Technical University.

SELECTED PROJECTS

Target & AIM Media — Outdoor Advertising Management Platform

NestJS · Next.js 16 · PostgreSQL · Prisma · FastAPI · Gemini AI · WebSockets

- Internal platform for Target Advertising, a 17-year MENA outdoor-advertising company with 450+ panel faces and 750+ clients.
- Covers inventory, campaign workflows, QR-scan ad verification, file storage, analytics dashboards, reporting and an AI voice assistant.
- Reused as a product for a second client in Lebanon; includes a CRM, admin dashboards and Excel product import.

TAD — B2B Learning Management System

NestJS · Next.js · PostgreSQL · Prisma · Redis · Swift

- Course platform with ~4,000 students one month after launch, plus a companion iOS app on the App Store.
- Role-based authentication with JWT and SMS one-time codes; Vimeo video hosting, Backblaze B2 storage and OpenAI features.
- Built **Tad Payments**, a gateway that wraps the EdFali SOAP payment API in clean REST endpoints with a web UI.

Atılım Schedule — University Schedule App

Swift · SwiftUI · Flutter · Node.js

- Generates conflict-free class schedules; officially adopted by Atılım University's Course and Exam Scheduling Office.
- ~7,000 active student users; native iOS, cross-platform Flutter and web versions with a Node.js backend.
- **1st Place, mPAD Projects Support Program, Atılım University (May 2025).**

Keystone — Structural Analysis Software

Rust

- Finite-element structural analysis program for civil and structural engineers, built in Rust (530+ commits).

Saydalia — Pharmacy Management & POS Desktop App

Electron · React · TypeScript · SQLite

- Offline-first pharmacy management system used by 15+ pharmacies across Iraq.
- Barcode checkout, inventory, prescriptions, accounting, licensing and auto-update, fully in Arabic (RTL).

Mizan — Accounting & Inventory System

TypeScript monorepo · pnpm · GitHub Actions · Windows installer

- Arabic-first, fully offline accounting and inventory system for small and medium businesses in Iraq.
- One server PC with multiple client PCs over the shop network; Iraqi dinar and US dollar side by side.

Libya Ministry of Economy — Application Workflow System

NestJS · TypeScript · PostgreSQL

- Government system for processing applications, with three user roles and separate interfaces.

Dalini — Navigation Backend (Iraq)

Go · OpenStreetMap

- Backend for an Iraqi navigation app: public API, device traffic-data ingestion, traffic-processing worker, scheduled jobs, admin panel and OpenStreetMap map building.

AI Legal Assistant — Graduation Project

Python · RAG · Vector Database · Flutter

- Legal-assistance platform covering Turkish law through a RAG pipeline over a legal-text vector database, with mobile and web clients.

Mobile Apps

- **Murafa'a** — Law-practice management app for Iraqi lawyers (SwiftUI, SwiftData, CloudKit, StoreKit 2, WidgetKit; native Android in Kotlin). Free/Pro subscription, iCloud sync, no third-party dependencies.
- **Warqa** — AI-assisted note-taking iOS app with on-device AI, live on the App Store.
- **Khatwa** — Arabic mental-health and self-care app, live on the App Store.
- **Najmi** — Arabic-first astrology app built on real astronomy calculations (Flutter, iOS + Android).
- **ATAG Bus Tracker** — Real-time shuttle-bus tracking for Atılım University (Flutter).

Other Client Work

- **Qi Card** — Branch-locator website for Iraq's largest card issuer and acquirer (Next.js, TypeScript).
- **ORKA** — E-commerce API and storefront for a medical-apparel brand in Basra (NestJS, Prisma, Next.js).
- **Al-Shafaq Al-Ahmar** — One API serving two field-rep mobile apps and an Arabic RTL control dashboard (NestJS, React).

TECHNICAL SKILLS

Languages	Swift, TypeScript/JavaScript, Go, Rust, Python, Dart, Kotlin, SQL, C/C++
Mobile	SwiftUI, UIKit, SwiftData, CloudKit, StoreKit 2, WidgetKit, Flutter
Backend	Node.js, NestJS, FastAPI, Gin, REST, WebSockets, SOAP integration, JWT/OTP authentication
Frontend & Desktop	Next.js, React, Vite, Tailwind CSS, Electron, PWA, Arabic RTL interfaces
Data & Infra	PostgreSQL, Prisma, Redis, MongoDB, SQLite, Firebase, Docker, GitHub Actions, Vercel, Backblaze B2
AI	OpenAI API, Google Gemini API, RAG pipelines, TensorFlow Lite

EDUCATION

Bachelor of Software Engineering — Atılım University, Ankara, Turkey 2021 – Aug 2026

AWARDS & RECOGNITION

- **1st Place — mPAD Projects Support Program**, Atılım University (May 2025) — for Atılım Schedule
- **Project Presenter — Atılım Research Days (ATAG 2025)**, organized by Atılım University's Technology Transfer Office (ARGEDA-TTO) (May 2025)

LANGUAGES

Arabic (Native) · English (Fluent)
